*NISABA*  
(STUDI ASSIRIOLOGICI MESSINESI)  
*Collana del Dipartimento di Scienze dell'Antichità  
dell'Università di Messina*

1

This volume is the first of a new series which joins the series *Pelorias* among the publications of the *Dipartimento di Scienze dell'Antichità* of the *Università degli Studi* of Messina. *Nisaba. Studi Assirilogici Messinesi* (NSAM) is intended to contain both volumes of edition of unpublished cuneiform tablets and studies that regard the various aspects of the Mesopotamian civilization during the three millennia of its development.

Who writes offers his sincere thanks to prof. Maria Caltabiano, Director of the *Dipartimento di Scienze dell'Antichità*, and to the Council of the Department who enthusiastically supported the project of offering Assyriology a Sicilian tool.

## PREFACE

This volume is the first of a series dedicated to the publication and to the study of Neo-Sumerian "messenger texts". A second volume is in preparation by the writers, that will put together all the Umma "messenger texts" so far published, dealing on the meaning and content of this important category of documents.

The publication of the present volume has been possible thanks to the Trustees of the British Museum who generously allowed to study and to publish the tablets under their control and thanks to the hospitable contribution of Dr. C.B.F. Walker and of the whole staff of the Student House, who didn't skimp on efforts to place dozens of tablets, requested day after day, at the writers's disposal. We also express our gratitude to Dr. M. Molina who gave a good deal of useful suggestions. We are very grateful to them.

The funds for the mission to London and the publication of the volume have been supplied by a fund of the *Università di Messina* and by a contribution of the *Ministero dell'Università e della Ricerca Scientifica e Tecnologica*.

F. D'Agostino transliterated the texts from No. 1 to No. 145 and F. Pomponio those from No. 146 to No. 291. F. Pomponio drew up the catalogue, while F. D'Agostino prepared the indexes. As a token of friendship, M. Molina and M. Such-Gutiérrez placed at the authors' disposal the Umma "messenger texts", that originally were part of their monography *Neo-Sumerian Tablets in the British Museum (BM 107926-108315)*, that also will be edited in 2002 in the series *Nisaba*. These new texts have been published in the Appendix together with their own catalogue; the names mentioned have been included in the indexes with those of the other texts.

In the transliterated texts an asterisk has been added to the signs not entirely preserved, or difficult to read. At the end of the volume a copy of these signs is presented.
